Halloween POD Launch Checklist

For SpookyScale-style prompt vaults: from prompt to listed product.

Week plan (before October 31)

Day 1: Pick 2 categories (e.g. stickers + T-shirts). Ignore the rest for now.

Day 2: Generate 20 designs. Keep the best 10, delete the rest.

Day 3: List 10 products with Halloween keywords in titles and tags.

Day 4: Check previews on mockups. Fix text cut-offs and dull colors.

Before you publish each listing

Title has the Halloween keyword + product type (e.g. spooky ghost sticker).

Mockup shows the design clearly at thumbnail size.

Price covers base cost + profit. Do not race to the bottom.

Description states sizes, colors, and print placement honestly.

Refund and rights check

Confirm your AI tool's commercial-use terms before selling.

Do not copy another seller's exact design or trademarked character.

Keep your prompt list and generation receipts for your records.

Free bonus from Pickzox. Not affiliated with Pixelova or SpookyScale.
