Invertebrate Documentary Story Starter

Five original story-form starters for your first invertebrate film:

1. A Day in the Life - follow one beetle from dawn to dusk.
2. The Hidden Hunter - a spider's ambush, told in slow beats.
3. Tiny Migrations - ants on a journey bigger than themselves.
4. The Reef at Night - coral invertebrates after dark.
5. Metamorphosis - one caterpillar, four acts, one reveal.

Tip: pick one form, one species, and one narrator voice per film.
