Campaign Quality-Control Checklist

The 15-minute review every AI-built campaign needs before it goes live — a free bonus from Pickzox

Check Every Claim

- ■ Compare every benefit claim against the real sales page.
- ■ Delete any income, traffic, or results promise you cannot prove.
- ■ Confirm the price and guarantee match the live checkout.
- ■ Replace vague AI phrases with specific, true details.
- ■ Read the review page aloud once; fix anything that sounds false.

Check Every Link

- ■ Click the affiliate link on the review page.
- ■ Click it again on the landing page and the bonus page.
- ■ Open one link inside the email sequence.
- ■ Confirm the link carries YOUR affiliate ID, not a default.
- ■ Test the opt-in form end to end with your own email.

Disclose and Comply

- ■ Add an affiliate disclosure above the first link.
- ■ Never let AI copy imply you used the product if you have not.
- ■ Check the platform rules for every social post.
- ■ Keep screenshots of the live sales page claims you relied on.

Polish the Output

- ■ Rewrite the headline in your own voice.
- ■ Swap one generic paragraph for a real example.
- ■ Add your own verdict sentence to the review page.
- ■ Proofread names, prices, and dates one final time.
