Printable Nativity Figure Template Sheet

A practice sheet for Nativity Playset Studio — test your printer scale and practice the cut-and-fold build before you print a full 48-piece set.

How to use this sheet

1. Print this page at 100% scale on ordinary paper (US Letter or A4).

2. Measure the adult figure below. It must stand 4.5 in (11.4 cm) tall once cut out. If it measures smaller or larger, check your printer settings — turn off any “fit to page” or scaling option and print again at 100%.

3. Cut along the dashed cut line, fold the tab back, and glue the support strip behind the figure. The figure should stand upright on the table on its own.

4. Only when the test figure stands up straight should you print a full set.

Figure size reference (adults 4.5 in / 11.4 cm tall)

#	Figure
1	Adult figure (Mary or Joseph) — 4.5 in / 11.4 cm tall once cut out.
2	Child figure — about 3 in / 7.6 cm tall, scaled to match the adult.
3	Animal figure (sheep or donkey) — about 2.5 in / 6.4 cm tall.
4	Star of Bethlehem — about 2 in / 5 cm across, glued to a support strip.

Cut-and-fold checklist

■	Printed at 100% — no “fit to page” scaling.
■	Adult figure measures 4.5 in / 11.4 cm tall.
■	Cut line followed cleanly — no torn edges on the figure.
■	Fold tab folded back at a right angle.
■	Support strip glued flat behind the figure.
■	Figure stands upright on the table without leaning.
■	For play: glue the figure to card for a sturdier stand.

Printer and paper tips

Ordinary paper works for a first test. Card makes sturdier figures for play. If a figure leans, the support strip is usually too short or the glue is still wet — let it dry flat for a few minutes, then stand it up again.

Bonus 1: Figure Template Sheet

PickZox exclusive bonus | Nativity Playset Studio

Made by PickZox as an original bonus for Nativity Playset Studio. Figures on this sheet are practice outlines only — make your own artwork with the Studio's prompts for your finished set.
