Listing Photo Checklist

Printable Baby Shower Games — make your Etsy listing photos sell the set

Before you shoot

- [ ] Print one full set on bright white card stock.
- [ ] Lay out all 31 games so buyers see the full set at a glance.
- [ ] Pick one theme per photo set — do not mix themes in a hero shot.
- [ ] Iron or flatten every sheet so no page curls show in photos.

The 6 photos every listing needs

- [ ] Hero: the full game set fanned out, bingo card on top.
- [ ] Close-up: one bingo card with its answer key beside it.
- [ ] Scale shot: a game sheet next to a pen or a hand.
- [ ] Theme shot: 3 game sheets from one theme, side by side.
- [ ] Print shot: the set coming off the printer, fresh and crisp.
- [ ] Mock-up: the games on a party table with cups and confetti.

Finishing touches

- [ ] Shoot in daylight near a window — no yellow lamp light.
- [ ] Keep the background plain: white linen or light wood.
- [ ] Check every photo at full size for blur before uploading.
- [ ] Name your files with keywords, e.g. printable-baby-shower-games-bingo.jpg.
